

Lost Connection = Lost Customers

Secure Uptime Keeps Your Brand Online, Protected, and In Business

Protected Network Solutions Built for Retail & Restaurants

In today's market, connectivity to mobile apps and digital interfaces are the lifeblood of any modern retail or restaurant franchise. Online sales can drive your business when you find the right solution to support your network needs.

You may be missing an opportunity. Let's change that.

Secure Uptime - What We Do is In Our Name

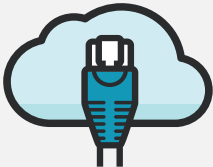

When You Do Business Online, Your Revenue and Reputation are On the Line.

Let's keep it simple. You need to keep your stores online and your network protected. At Secure Uptime, that's exactly what we offer. By combining the right equipment with round-the-clock monitoring and adaptive protocols, we ensure that you stay secure and online at all times.

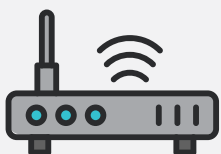

DATA SECURITY & BREACH PROTECTION

The security of your network and the protection against cyber threats are critical elements for all online sales. With Secure Uptime, you can rest assured that your network is suited up and ready to defend against external attacks and human error.

INTERNET SERVICE & CLOUD CONNECTION

We know how important it is to have a stable connection to your cloud-based apps and services. When you're disconnected, you're limited to in-person sales. Don't settle for less. Equip your business to function to its full potential by trusting in a network solution that provides direct vpn connections, wired and wireless connectivity, and automatic failover to keep you online and ready for business.

NETWORK EQUIPMENT

We make sure you are set up correctly with the right network equipment. If you're just getting started, we remove network equipment from your capital expenditure and include it in our service. Take the following off your shopping list: Firewall, Network Stitch, WAP, LTE Backup Modem Battery Backup, and any other equipment you need for a secure network connection. Already have network equipment? We'll manage it for you.

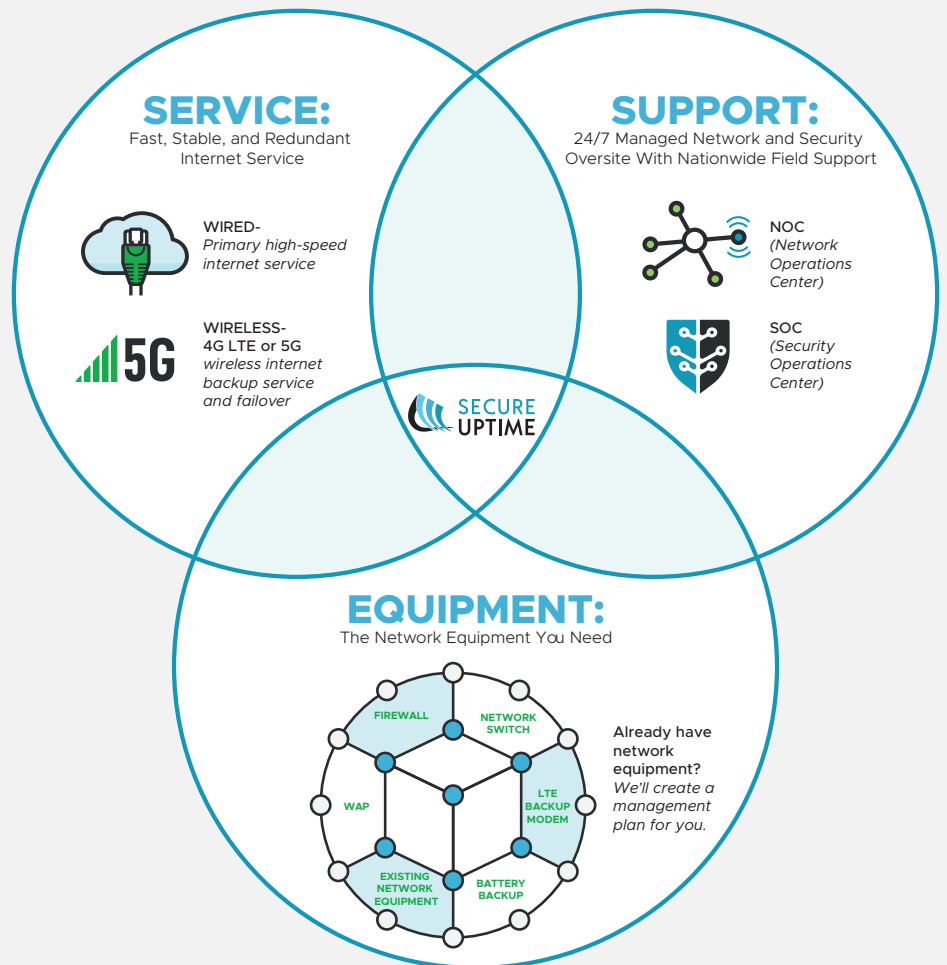

Is Downtime Letting Your Customers Down?

Demands for digital are high – make sure you can meet them

At Secure Uptime, we understand what happens when you lose connectivity and how this downtime can affect your bottom line. Our network solutions have been developed through years of experience, discovery of best practices, and adaptation to the digital evolution of sales. We take care of ALL your network needs for a set monthly cost so you never have to wonder what your expenditure will be.

Ready for a solution that will keep your brand *secure and connected?*
